CUSTOMER SUPPORT SERVICES

BACKSTOP/ENDSQUARE UPGRADES

Globe Machine Manufacturing Company has been supplying quality equipment to the wood products panel and material handling industry for over 90 years. Our commitment to customer service and technical support is evident by the numerous repeat customers we have supplied equipment and services.

Recognizing the needs of our customers, we are continually working to improve the operation and durability of our equipment. The extensive research and development efforts of Globe Machine's engineering design department ensure our backstop / endsquare assemblies stand up to the many cycles and constant impact of continuous mill operation.

Additionally, Globe engineers have designed an upgrade assembly that will work with new stacking systems or retrofit onto an existing backstop assembly.

Upgrade Process

1. Contact Globe to determine the back/stop assembly currently in service on your equipment.
2. Order the upgrade package.
3. Arrange for installment of your system by a Globe Field Service Technician or your mill maintenance personnel.

Advantages to using a Globe Field Service Technician

- Thorough technical knowledge of your upgrade
- Ability to fine-tune the assembly to meet your production rate and speeds
- Training of your operations personnel with regards to maintenance and set-up procedures

FEATURES

- Backstop made with hardened pins
- Hardened cam follower and pin tracks
- Hardened bushings over pins
- Airbag and stop bracket to relieve pounding caused by home position retract

BENEFITS

- Packages discharged with even ended bundles
- Less damage / improved panel quality
- Dramatic improvements to wear indication when compared to original assemblies
- Backstop life increased by over three times.
